Definition of "Advanced Lamp"

What are Advanced Lamps?

- Bare spiral CFLs greater than 30 watts
- A-shaped CFLs
- Globe CFLs
- Candelabra CFLs
- Reflector CFLs
- 3-way CFLs
- Bare & covered dimmable CFLs
- GU-24 products
- EISA-compliant halogens
- Advanced incandescents
- LEDs

Study Overview

Objectives

- Key Objective
 - Provide baseline data for key advanced lighting market indicators
- Two Study Phases
 - Phase 1
 - Mine existing data on California retail store shelf availability and diversity, California household installation and storage rates
 - Draft report presented in March
 - Phase 2
 - Mine existing data on California and non-California sales, California non-residential installations and non-California retail store shelf availability and diversity
 - Conduct literature review of advanced lamp market research outside of California
 - Draft report presented in June

Study Overview

Baseline Indicators

Residential Advanced Lighting Baseline Indicator	Data Source
Phase 1	
Availability, stocking of advanced lamps	2008-2009 California shelf survey data
% of household sockets filled w/advanced lamps	2008-2009 California residential socket inventory data
% of bulbs in storage that are advanced lamps	2008-2009 California residential socket inventory data
Phase 2	
Availability, stocking of advanced lamps outside of California	2008-2009 non-California shelf survey data
% of CFLs installed in small commercial applications that are advanced lamps	2006-2008 upstream nonresidential CFL data
% of 2008-2009 lamp sales for which advanced lamps account *	2008-2009 ACNielsen, Activant data
Prices for advanced lamps	2008-2009 ACNielsen, Activant data

* Drug, grocery, hardware, and some mass merchandise channels only.

Datasets

- Retail store shelf survey data
 - California
 - Collected in 2008-2009 as part of 2006-2008 Upstream Lighting Program Impact Evaluation
 - Includes 326 stores throughout California***
 - Non-California
 - Collected in 2009 as part of 2010 CFL Market Effects Study
 - Includes 115 stores in Georgia, Pennsylvania, and Kansas

Datasets

- California socket inventory data
 - Residential
 - Collected in 2008-2009 as part of 2010 Residential Lighting Metering Study
 - Includes data on installation and storage for all lamp types from 1,200+ homes
 - Nonresidential
 - Collected in 2009 as part of 2006-2008 Small Commercial Contract Group Direct Impact Evaluation
 - Includes data on CFL installation in 677 nonresidential sites

Datasets

- California and Non-California Point-of-Sales Data
 - Retail store scanner data for 2008, 2009, and 2010
 - Data sources include AC Nielsen and Activant
 - Channels include grocery, hardware, and drug

Presentation Overview

- CA and Non-CA retail stocking
 - Percentage of stores carrying advanced lamps
 - Percentage of total lamps by lamp type
 - Percentage of total lamp packages by lamp type
- CA lamp diversity in retail stores
 - Number of unique model numbers per store
- CA lamp installation and storage rates
 - Residential (all lamp types)
 - Nonresidential (CFLs)
- CA and Non-CA retail lamp sales
- CA and Non-CA retail lamp pricing

Advanced Lighting Baseline Study Phases 1 and 2 Key Findings

Key Findings: California and Non-California Retail Store Inventory

Availability

- Across all store types, the percentage of CA and non-CA stores carrying specific MSB lamp types are fairly similar
 - A few exceptions
 - Incandescents available in fewer non-CA stores than in CA stores (81% and 87% respectively)
 - Dimmable reflector/flood CFLs were found in nearly 2/3 of non-CA stores but <1/3 of CA stores
 - Tube CFLs were found in 8% of non-CA stores and 15% of CA stores

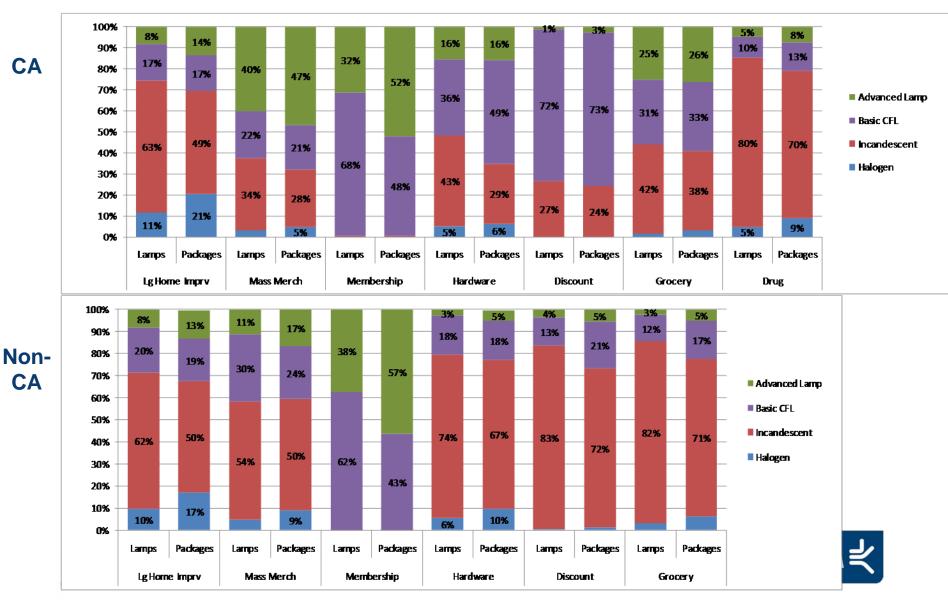

Availability

- Within specific store types, there are notable differences between CA and non-CA stores for certain lamp types
 - High-wattage tube CFLs were found in 14% of CA mass merchandise and hardware stores (and 4% of California membership stores), but were not available in any non-CA mass merchandise, hardware, or membership stores
 - Three-way spiral CFLs were found in 2/3 of CA membership stores but only 14% of non-CA
 - Three-way spiral CFLs were found in 63% of non-CA grocery stores, but only 21% of CA grocery stores
 - Globes were found in 79% of non-CA grocery stores, but less than 1/3 of CA grocery stores

Advanced Lamp Inventory

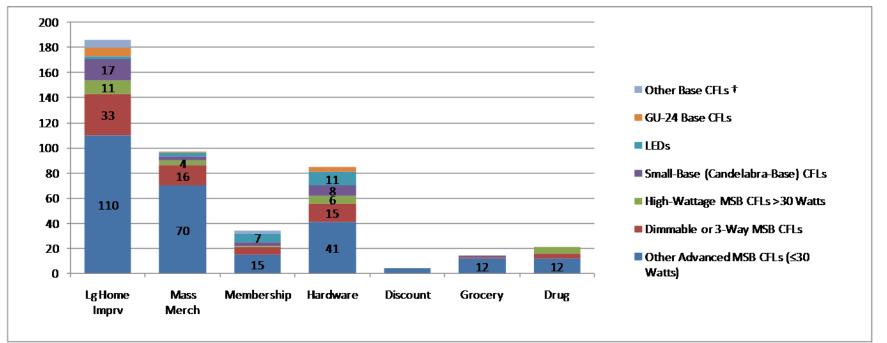

See report tables 4-3 through 4-6 for # lamps/packages by channel.

Advanced Lamp Diversity

California Stores:

Number of Advanced Lamp Models by Lamp Type and Store Type, 2009*

* See report Table 4-7 for number of advanced lamp models by store type. † Excludes standard pin-based CFLs (non-GU based) as these are not considered Advanced Lamps.

17

Total # unique models = 351. See report table 4-7 for # models by channel.

Conclusions

CA/Non-CA Availability

- With few exceptions, percentage of CA and non-CA stores carrying various MSB lamp types were similar in 2008/2009
 - Incandescents and tube CFLs in more CA stores than non-CA stores
 - Dimmable reflector/flood CFLs in more non-CA stores than CA stores
- More noteworthy differences in CA/non-CA advanced lamp availability within specific store types
 - High-wattage tube CFLs were found in CA mass merchandise, hardware, membership stores but none in non-CA
 - Three-way spiral CFLs were found in more CA membership stores than non-CA
 - Globes and three-way spiral CFLs were found in more non-CA grocery stores than CA grocery stores

CA/Non-CA Inventory

- Advanced lamps and basic CFLs accounted for either a greater or similar proportion of total lamps in CA stores versus non-CA stores in 2009
 - Incandescents accounted for less than half the MSB lamp inventory in CA mass merch stores than in non-CA
 - Basic CFLs accounted for a much larger proportion of total lamps found in CA hardware and discount than in non-CA
 - CA grocery stores stocked less than half the proportion of incandescents as non-CA stores; fairly high proportion of advanced lamps in CA grocery
 - Advanced lamps comprised 4x the proportion of total lamps CA mass merch versus non-CA mass merch
 - CA/non-CA Large home improvement stores and mass merch stores had similar inventory proportions

Diversity (CA)

- Across all store types in CA, MSB reflectors had the greatest diversity in 2009 (85 models)
 - Followed by a-lamps (57 models) and globes (37 models)
- Across all advanced lamp types, large home improvement stores had the greatest overall diversity (186 models)
- Discount stores had the lowest diversity of advanced lamps (4 models)
- There were 17 unique LED models found across all store types
 - Hardware stores had the greatest diversity across all store types (11 models)

CA Residential Installation/Storage

- California households were dominated by incandescents in 2009
 - 56% of installed and 60% of stored lamps
- Basic CFLs accounted for larger fraction of stored than installed lamps
 - 16% of installed and 27% of stored lamps
- Advanced lamps comprised a small proportion of lamps installed/stored in CA households in 2009
 - Only 6% of installed, 5% of stored
 - Mostly reflector, globe, and tube CFLs ≤30W

CA Non-Residential Installation/Storage

- In 2009, advanced lamps represented approximately 42% of all installed CFL lamps and about 25% of all CFL lamps in storage.
- Basic CFLs were in storage at a higher rate than advanced CFLs.
- Reflectors and candelabra-base CFLs were the most commonly installed advanced lamps.
- Advanced lighting was installed more frequently than basic CFLs in fixtures controlled by dimmers, motion sensors, timeclocks, and twist timers.
 - However, 40.8% of the bulbs installed in fixtures controlled by dimmers were found to be basic CFLs (which should not be used in dimmable sockets).
- Offices in small retail buildings had the highest percentage of advanced CFLs (81.3% of CFLs found).
- Restrooms in health/medical centers had the lowest percentage of advanced CFLs (3.7% of CFLs found).
 KEMA

CA/U.S. Sales

- CFL Shares Decreasing in CA 2008 2010
 - Sales of CFLs as a percentage of MSB sales in CA's large food and drug stores have decreased since 2008.
 - CFL shares in CA hardware stores and in each of the three channels in the US have remained fairly steady over the same time period.
- Shares of ALP lamps increased slightly in large food stores and hardware stores in CA.
 - Increasing from 0.6% to 0.8% in large grocery stores and from 2.8% to 3.2% in hardware stores.
 - Shares in drug stores decreased from 2.8% to 1.5%.
- CFL reflectors accounted for the largest share of ALP lamps sold in both CA and the US.
 - Ranging from approximately 30% to 50% for most regions, retail channels and years.

CA/U.S. Prices

- The average price of an incandescent sold through large food, drug and hardware stores in California was higher than in the United States in every year and in each of the three retail channels.
- The average price of a basic CFL sold in large food stores was lower in CA than in the US, however, the opposite is true of basic CFLs sold through hardware stores.
- The average prices of a ALP lamps sold between 2008 and 2010 in hardware stores were lower in the US than in CA.
 - A couple exceptions to this were for dimmable CFLs and CFLs with base types other than MSB.

Thank you for your attention.
