Program Manager Interview Guides and Findings for Express and Upstream Programs

A.1 Express Efficiency Program Manager Interview Guide

A series of interviews were conducted with Express Efficiency program managers at SCE, SCG, SDG&E, and PG&E in March 2007. These interviews confirmed each utility's energy savings verification processes, discussed program accomplishments, reviewed program processes, and asked about recommended program changes.

In order to assess the program's processes, the Itron team discussed a number of issues with the project managers including program design and evolution; coordination efforts carried out by the four California independently owned utilities (IOUs); vendor involvement; the relationships, effectiveness of program marketing, and effects of third-party program competition; and hard-to-reach participation. A program manager interview guide was developed and followed closely for our first interview, however as we continued to interview Express program managers, the guide became more of a springboard for discussion. The interview guide is provided here in this section for reference:

PY 2004-05 Project Manager Interview Guide for the Statewide Express Efficiency Program Interview Objectives

Interviews with project managers of the Express Efficiency Program will be conducted to:

- Discuss program evaluation objectives,
- Obtain program manager input to help refine objectives and research issues, and
- Discuss program design, verification process, program accomplishments,
 marketing activities, market effects, and vendor operations with program managers

As part of our interviews with IOU program managers, we will conduct a Best Practices gap analysis review. The focus of this component of the interview will be to provide input on how *current* practices may or may not be incorporating best practices identified in the study, and why they are not being implemented. Our evaluation team will leverage the work we conducted as part of the Best Practices study to conduct this gap analysis for the Express and Upstream programs, and make recommendations on how the current programs can be enhanced by adopting specific best practices.

Benchmarking Program Success

- 1. How would you describe the program theory for the Express and Upstream programs? How, if at all, does this compare with similar prescriptive incentive program offerings in nonresidential markets?
- 2. What would you say has been a program success story with PY2004-05 relative to previous years?
- 3. What lessons learned have you obtained from other programs; for example, other successful prescriptive incentive programs around the country?

PM Background and Perspective

- 1. What was your official role with the Express Program for 2004-05? Did that change over the past two years?
- 2. What is your "history" with the Express program? How long have you been involved? What was your role in previous years? What is your role now?
- 3. Based on your experience with the program, how would you describe the evolution of Express over the past five years? Did the evolution affect the way the program was implemented over the 2004-05 program cycle?

Verification of Savings

Evaluation approach

The evaluation approach uses program tracking data, staff interviews, on-site audits, and the inspection data to:

- Review the program inspection process and results,
- Conduct on-site verification audits, and
- Verify program accomplishments.

Inspection Processes by IOU

We understand that, for PY 2004-05, each IOU had its own inspection process. The last Express Efficiency study listed these inspection processes as follows s:

- SCE randomly selects 20% of participating sites for inspection. Beginning in 2004, SCE conducted mandatory inspections for jobs of \$2,000 or more (up from a threshold of \$1,000 in 2003) in response to a higher rebate cap that increased the size of jobs.
 - At the sites inspected, are ALL measures verified?
- SDG&E inspects all participating sites (with the exception of hotel rooms) due to a concern with drop shipping in past years of the program. SDG&E increased the charge for re-inspection (10% of entire rebate or \$200, whichever was higher).
 - At the sites inspected, are ALL measures verified? ...or sample of measures
 (i.e. pick % of CFLs and then if they are all where expected...ok)
- PG&E conducts random inspections on 20% of applications and 100% inspections for any application over \$2,500 and over 100 CFLs. If a problem arises with a particular vendor, PG&E inspects all of that vendor's work.
 - At the sites inspected, are ALL measures verified?
- For SCG, the inspection process changed between 2002 and 2003 with the addition of the following component to their process: Account Executives (assigned customers > 50,000 therms) and Service Technicians (unassigned customers, < 50,000 therms) inspect all their applications and hand-deliver the rebates after installation. Additionally, SCG randomly selects 5% of participating sites for inspection.

Questions - Inspection Process

- 1. Did the inspection processes change in PY 2004-05? If so, how?
- 2. What information is collected during on-site inspections and how is it tracked?

Program Accomplishments – IOU Specific Questions

Questions here are meant to start a discussion and are not necessarily going to be asked directly.

PG&E

- The workbooks show that the overall kWh savings goal was surpassed. What were the major contributing factors?
 - Was the high level of accomplishment expected for reflective window film?
- According to the workbooks, PG&E accomplished 90% of lighting goals. While 90% is close to the goal you have stated in the workbooks, did you at some point during 2004-05 program cycle decide to focus on other end uses? Did any specific lighting measures to extremely well/not well?

SCE

- The workbooks show that overall goal was surpassed by 12%. What were the major contributing factors to this success?
 - Was the high volume of programmable thermostats expected?
- The goal for cool roofs was not met. Was it set for the 2004-05 program year based upon the high volume of cool roofs from the previous program cycle?
- Discuss the shortfall in refrigeration (83% of goal met). Specific measures?

SDG&E

- Overall therm goal was surpassed. What can this be attributed to?
- The workbooks show that only 70% of the overall kWh goal was met. What were the major contributing factors to this shortfall? Slow start? Funds shifted?
 - What was the issue with food services?
 - Why the low volume on lighting (only met 70% of internal goal)? Specific measures?

SCG

- Overall therm goal was surpassed and SCG saved more therms than PG&E. What factors have contributed to this success?
- Why the low volume on pipe insulation (compared to goals)?

Rebate Levels

1. For which measures was it easy to meet unit goals? More difficult? Any changes from 2003 in ease/difficulty in meeting goals (i.e., were goals set higher or lower for particular measures; was customer response different)?

- 2. How effective were the changes to rebate levels in increasing/decreasing demand for program measures? In meeting program unit and energy savings goals?
- 3. Do you like the current rebate levels for the 2006-08 program cycle? Are some too high or too low? What would you change?
- 4. What messages are you are sending to vendors about rebate levels (e.g., rebates are staying fixed, don't count on any increased rebate levels this year)?

If there were major changes in incentives, then ask the following questions.

Changes in Rebate Levels

- 1. If you had to guess, of all your participation, what percent happened during periods of increased rebates?
- 2. Can you provide documentation (i.e., application or program literature) that shows when increases in rebate levels occurred and the amounts of the rebates?
- 3. What was the timeframe that the increase in rebate levels were offered? Was this timing consistent statewide?
- 4. How do you promote increased rebate levels (vendor or customer focus, what delivery method?)
- 5. Do vendors staff up for times of increased rebate levels?
- 6. We are interviewing vendors. Are you interested in hearing about any questions regarding increased rebate levels?

Process Assessment

There are several big pieces to the process evaluation. Interviews with vendors, customers (P/NP), community-based organizations (CBOs,) and program managers are planned to assess the following:

- Statewide coordination,
- Vendor involvement,
- Effectiveness of program marketing,
- Assessing satisfaction with the program,
- Participation eligibility review,
- HTR participation review, and
- Third party competition.

Questions – Statewide Coordination

1. What areas of the program were coordinated (i.e., marketing, incentive levels)?

- 2. How was coordination achieved? Previously, program managers met bi-weekly to ensure consistency across rebates, sales promotions, product specifications, and program design and materials. Was this continued in 2004-05?
- 3. In what ways has statewide coordination benefited the Express program? Did it help to provide economies of scale?
- 4. What challenges have you encountered in coordinating Express across utilities (i.e., measure mix, rebate levels)?
 - Are there difficulties related to the unique needs of each IOU, driven by market factors and service territory differences?

Questions - Vendor Involvement

- 1. How do vendors learn about the program (kickoff meeting, email messages, mailed letters)?
- 2. Describe your vendor relationships and how they factor into program performance.
- 3. Did you work with the same trade allies as in previous years? Were any trade allies more or less active?
- 4. Have you developed any new initiatives to inform vendors about the program, aside from email and letter updates?
- 5. What, if any, incentives, programs, etc., are offered to vendors to increase their services to small businesses and HTR customers?
- 6. Regarding how vendors operate, respond to sales, and view the various service territories:
 - Do you find that most of your participation is occurring with vendors that are active statewide or only locally?
 - Is a larger proportion of the vendors that serve the program located in Southern California?
 - Do you think some vendors are attracted to Northern or Southern California and why?
 - What percentage of participating vendors would you classify as large or statewide, versus small or locally operating?
- 7. How have competing programs affected Express participation (SPC, Small Business Programs, Pilots)?
- 8. We will be interviewing vendors as part of our evaluation.
 - Do you have any interest in asking vendors about possible incentive levels?
 - Are there any vendors that are key players with which you suggest we speak?

<u>Questions – Effectiveness of Program Marketing</u>

Program Marketing

- 1. How do customers find out about the program (direct mail to customer, bill inserts, outreach by account managers, service technicians, and vendors, etc.)?
- 2. How did marketing, promotions, and outreach differ (if at all) from previous years and how effective were these changes?
- 3. What marketing **messages** are you trying to convey to:
 - Customers?
 - HTR segment?
 - Vendors?
 - CBOS?
 - Manufacturers?
 - Retailers?

What information do you want them to retain?

- 4. What marketing **activities** were most effective in reaching HTR customers? CBOs? Vendors?
- 5. What marketing activities were most effective in garnering assistance in marketing the program from vendors, CBOs, manufacturers, and retailers?
- 6. We are interviewing participating and nonparticipating customers. Are you interested in hearing about any questions regarding program marketing?
- 7. Are you informing customers about no cost/low cost conservation activities they can implement? Is this an important aspect of the program, or is it secondary?

Community-Based Organizations

- 1. Describe the role of CBOs in marketing the program.
- 2. How do you interact with CBOs? At what kind of events?
- 3. What do you think CBOs are doing to promote the program?
- 4. How much influence do you think the CBOs have had on the program, on participation?
- 5. Are there some CBOs that you suggest we talk to that are more active?
- 6. Anything else you would be interested in hearing about from them?

Lighting

1. Were there any changes in the number of Express participants due to the decrease in 4 ft. T-8 incentives (\$6.80 to \$4.25) and the increase in rebates for delamping (increased to \$6 for 4ft., \$4 for 2 and 3 ft., and \$9 for 8 ft.)?

- 2. Were any practices adopted to ensure proper lighting quality (i.e. pre- and post-light level reading requirement)? *Based on workbooks, both PG&E and SCE increased T-8/delamp while SDG&E was about equal.*
- 3. Were there any changes in the number of Express participants due to the decrease in rebates for 14-26 watt CFLs (\$5.60 to \$3.47)?

Questions - Satisfaction with the Program

- 1. What elements of the program do you think drive overall satisfaction? In previous years, rebate turnaround time, rebate levels, and response to customer complaints have been cited.
- 2. With what elements of the program do you think customers are most satisfied? Dissatisfied with?
- 3. What about satisfaction with rebate turnaround? Were there any changes to the way customer rebates are processed that may have affected turnaround in 2004-05?

Questions - HTR Participation

We are assessing the extent to which HTR customers are underserved.

- 1. How easy or difficult was it to meet HTR goals in 2004-05? (In 2003, all the IOUs met their HTR goals. All but SCE met their HTR goals for the 2004-05 program cycle).
 - For SCE: the latest narrative (Feb. 2006) shows a hard-to-reach goal of 40% while the cumulative and committed percentage of participants reached is 37%. Is this information accurate?
- 2. Did you use similar strategies as 2003 to target HTR areas, such as the use of program materials translated into different languages, presentations at community based organization events, etc.? What strategies were used?
- 3. How has the HTR emphasis affected Express program participation?
 - How has it affected the cost-effectiveness of the program overall?
 - With respect to marketing?
 - With respect to administration (i.e., application processing, check processing, inspections)? With respect to program implementation?
 - With respect to the measure mix (i.e., \$/kW in incremental costs and measure life)?

Questions - Third Party Competition

1. Have third party and local IOU programs competed/complemented Express and Upstream programs during the 2004-05 program cycle? During PY2003, program managers from SDG&E and PG&E reported that third-party programs cut into the

participation in Express because these programs offer higher rebates, target the same customer segments (e.g., PECI's grocery program and a local program offering higher boiler rebates in SCG territory), or offered a direct install approach. SCE, however, saw no significant impact on Express.

- 2. Was there confusion among participants over eligibility and sponsorship due to overlapping third party programs and multiple rebate offers?
- 3. Was it more difficult to get HTR customers to participate due to third party programs? Why? Why not?
- 4. Do you feel that third party programs are more or less cost-effective than Express in reaching HTR customers? What are the advantages and disadvantages of third party programs with respect to attracting HTR customers?

CFL Study: Research Issues and Program Implications

As part of the 04/05 evaluation, the Itron team will conduct an effective useful life retention analysis of lighting participants from PY 02/03. Itron will interview 300 CFL participants from PY 02/03 and during the interviews will recruit 50 for on-site visits to verify the retention data collected over the phone.

■ Do you have any questions that you would like added to the interview guide?

Closing Comments and Questions

Including some general questions for: Market Opportunities Assessment/Market Effects

- 1. In general, what impact do you think the 2004-05 program has on the marketplace?
- 2. Did you see much innovation in project design or measures? What types of projects?
- 3. Did you note any major changes in the level of interest in the marketplace between 2003 and 2004-05 (perhaps evidenced by info. requests, length of waiting lists)?
- 4. How has pulling out upstream HVAC and motors as a separate program from Express affected accomplishments?
- 5. What do you feel Express should be in the future?
- 6. Are there any new measures being rebated in 06-08? Which do you think have the most potential? Least potential?
- 7. What other measures would you like to see in Express?
- 8. What changes do you believe would increase participation?
- 9. What changes do you believe would increase cost-effectiveness?

- 10. What program innovations are under consideration?
- 11. Should there be a "custom" measure category (e.g. pay x cents per kWh saved)
- 12. Should Express continue to have HTR goals? Should they increase/decrease?
- 13. Is a small/very small goal still necessary?
- 14. What other research activities would be useful to you?
- 15. Lighting contractor interviews: anything you are interested in hearing about from participating vendors?

A.2 Express Efficiency Program Manager Interview Findings

The views and insights of the 2004/2005 Express Efficiency program staff are summarized below.

A.2.1 Verification

Each of the California IOU's has essentially maintained the same inspection process for the 04/05 program as was used during the 2003 program cycle. These energy savings verification processes are as follows.

- SCE randomly selects 20% of participating sites for inspection. Beginning in 2004, SCE conducted mandatory inspections for jobs of \$2,000 or more (up from a threshold of \$1,000 in 2003) in response to a higher rebate cap that increased the size of jobs. SCE reports that during inspections, it counts all bulbs and accounts for all measures. The only deviation from this process is for hotel and motel rooms. In these cases, 10% of the installations are verified.
- SCG inspects virtually all participating sites. The verification procedure requires 100% inspection. Account executives are responsible for accounts with annual usage over 50,000 therms. Accounts with annual therm usage below 50,000 therms are verified by Commercial Service Techs (CSTs) or the Industrial Service Techs (ISTs).
- SDG&E inspects all participating sites, including hotel and motel rooms, due to a concern with drop shipping in past years of the program. If rooms in hotels and motels are occupied, SDG&E's inspectors arrange a return visit to verify the presence of measures when those rooms were unoccupied. SDG&E increased the charge for re-inspection (10% of entire rebate or \$200, whichever was higher). SDG&E does not charge hotels and motels a re-inspection fee when it sends inspectors to inspect previously occupied rooms.
- PG&E conducts random inspections on 20% of applications and 100% inspections for any application over \$2,500 or over 100 compact fluorescent lamps (CFLs). If a problem arises with a particular vendor, PG&E inspects all of that vendor's work. Express Efficiency program staff stated that for hotels, random inspections of rooms occur and inspectors generally cover about 80% of rooms.

A.2.2 Program Accomplishments

Overall, each of the four California IOUs reported program accomplishments that exceeded the goals established by the California Public Utilities Commission (CPUC), with lighting measures continuing to lead accomplishments for SCE, SDG&E, and PG&E. A large fraction of SCG's therm accomplishments were attributable to water heating measures as well as greenhouse gas curtains. Express Efficiency program staff highlighted the following accomplishments.

- SCE surpassed its kWh goal by 12%, with lighting leading the field. Successful measures that helped SCE surpass its goals include CFLs, T8 electric ballasts, and high bay T5s. In addition, programmable thermostats were a popular measure relative to others being rebated by SCE under the program.
- SCG's therm goals were primarily met through a number of water heating measures, such as tank and pipe insulation and boilers. An extremely popular measure for SCG was greenhouse gas curtains. This measure alone accounted for approximately one-third of SCG's therm savings for the 04/05 program cycle. In discussions with the program manager, the Itron team learned that rebates for this measure were capped at \$25,000 per account per year.
- SDG&E reportedly met 70% of its overall kWh goal, but well surpassed its therm goal. The program manager stated that in spring of 2004, projections of what they expected to accomplish by the end of the year were equal to 48 million kWh. The program was on track to meet this end-of-year goal, so a decision was made to shift funds to other programs to improve the overall energy efficiency portfolio of programs. This shift of funds, in addition to competition from local third party programs targeting the same customers, accounted for the shortfall in meeting its kWh goal.
- Lighting led the field for PG&E, accounting for over 80% of program accomplishments during the 04/05 program cycle. The most popular lighting measure by far was CFLs. Another popular lighting measure was occupancy sensors. Other measures that contributed to PG&E surpassing its kWh goal by 16% include programmable thermostats and a number of refrigeration measures.

A.2.3 Process Assessment

A number of topics regarding program processes were covered with the Express Efficiency program managers. Since this is a statewide program, the Itron team wanted to compare and contrast how each of the utilities viewed the program's rebate structure and statewide coordination efforts, and how they engaged in vendor relationships, carried out program marketing, competed with third party programs, and involved the hard-to-reach segment of their customers. Express Efficiency program staff feedback on each of these areas is described below.

Rebate Structure

As part of the utilities' coordination efforts (discussed in detail below), rebates remained the same for the most part across the SCE, SCG, SDG&E, and PG&E service territories. The only changes in rebates noted by program staff were for delamping of high bay lighting (SCE only) and greenhouse gas curtains. The rebate initially was equal to \$0.40 per square foot for greenhouse gas curtains, but program staff from each of the utilities together concluded that this was too high. It was subsequently revised downwards to \$0.20 per square foot. SCE noted delamping had a large energy savings potential and consequently changed its rebate for

delamping of high bay lighting from \$75 to \$100. According to the 04/05 program manager, this change in rebate structure led to a large increase in delamping during this program cycle. Many of the delamping projects occurred in warehouses and big box retail locations.

While the rebate structure was retained for most measures across the utilities, SCG reported that it placed a \$25,000 cap on greenhouse gas curtains per customer per year. This cap was put in place to ensure that rebates could be paid out to a wide spectrum of customers rather than a select few. Neither PG&E nor SCE had a similar cap, likely because these utilities did not have the same sizable greenhouse gas curtain potential as SCG did. SCG reported that beginning in 2006, the cap for greenhouse gas curtains was increased to \$50,000 and that the other utilities still have no cap on this measure.

SCE mentioned it was pleased that changes to the rebates offered on many measures covered under the Express Efficiency program were not needed to encourage program participation by customers. Itron confirmed this feeling in interviews with the program staff from the other utilities.

Statewide Coordination

Express Efficiency program managers reacted positively when asked whether statewide coordination efforts were useful before and during the 04/05 program cycle. The managers reported that they met regularly to ensure consistency in rebate levels, product specifications, program design, and promotion materials. Most of the coordination efforts revolved around administrative tasks such as the writing of the Policies and Procedures Guide and creating and updating the program application; however, the program managers from each of the utilities commented on the benefits of sharing data and information during their meetings as well.

Economies of scale and specialization were reported as clear benefits according to program staff from SCE and SDG&E. SDG&E mentioned that it benefited from research carried out by the other utilities regarding energy savings from specific measures, since they tended to have more resources to dedicate towards these efforts (SCE dedicated resources towards refrigeration, SCG towards greenhouse gas curtains, and PG&E towards overall program administration and processing). SCE stated that PG&E processed all of its rebate applications. While program offerings and rebates were coordinated across the four California IOUs, program marketing was carried out by the utilities separately. Marketing efforts are discussed below.

Vendor Involvement

Vendors, according to SCE, SDG&E, and PG&E, are and have been the main drivers of the Express Efficiency program over much of the program's lifespan (SCG has traditionally

looked to its account executives, customer and industrial service technicians, and field representatives to inform customers about the program). The utilities rely on vendors to act as intermediaries by approaching customers with their knowledge of the measures, informing them of their energy savings potential, and explaining that purchases of specific equipment can qualify them to receive rebates. Since the utilities recognize the role of vendors in the success of the program, they make sure to keep vendors abreast of the measures for which rebates are available by inviting them to presentations and information seminars related to the program. PG&E program staff mentioned that it would hold vendor breakfasts to foster relationships and inform them of the program. The main forms of communication with vendors included e-mails, letters, kickoff meetings, and tradeshows. The exception was SCG, who primarily relied on their own staff to inform customers of the program.

Program Marketing

As mentioned above, program marketing was not coordinated across utilities. Each utility carried out its own campaign and often relied on similar tools; however, no statewide Express Efficiency program marketing materials were developed. All of the utilities relied on bill inserts and direct mail pieces to inform customers and vendors about the program. SCG mentioned that in addition to these traditional means of communication, it spread the message about the program through Internet as well.

Account representatives at SCE were a main source of information about the program, as they would interact with customers on a regular basis. The program managers also mentioned vendors as a source of information and felt they played a large role in marketing the program for the utilities as well. SCG reaffirmed the beneficial role played by its account executives in marketing the program.

The program manager of SDG&E reported that much of its marketing was based on the production and distribution of fact sheets that would be distributed to vendors so they could in turn provide them to customers. According to SDG&E, "those who worked on getting this message out included our outreach teams, Account Executives, and Public Affairs – everyone who had contact with customers. We even had some of our service planners, who were doing things like re-wires for customers. We would provide them with rebate forms, rebate applications, and fact sheets. Just because a customer may be doing a re-wire, doesn't mean they are not interested in doing something else down the line. Again, we approached getting our message out from a number of different angles."

Trade shows and presentations were also mentioned by the utilities as tools to market the program. SCG used its Energy Resource Center in Downey, California to distribute literature about the program and to hold seminars to educate vendors and customers about the program. SDG&E mentioned making presentations as well. Vendor breakfasts held by

PG&E were also a way the utility informed individuals about the program in the hope that vendors would bring the information back to customers.

For the kickoff of the 06/08 program cycle, PG&E conducted a mass mailing to all vendors in their trade ally database that were active in the last 10 years. It was the utility's way of informing vendors that the Express Efficiency program would be renamed, but will still cover the same measures, if not more.

Program Satisfaction

Overall, each of the four utilities felt customers were satisfied with the program. It was noted that customer (and vendor) satisfaction was linked to rebate levels and application turnaround time. SCE mentioned its efforts to simplify the role of the customer by encouraging them to come to SCE with a project without knowing under which program it fits. SCE will then determine which program best fits the customer. One step they have taken to serve customers successfully is to offer an application that is a blend between offerings from the Express Efficiency and Standard Performance Contract (SPC) programs. This allows a customer to apply without having to understand all of the specifics, yet still be able to take advantage of the programs.

SCG mentioned that one of the benefits customers see with the program is that they do not have to go through a pre-inspection. The SCG program manager stated, "The idea of Express is that you don't have to pre-qualify everything. It's prescribed. Customers like that. Everything they need to know basically is right here in the terms and conditions and the tables. If you buy (prescribed measures) you don't even have to contact us. You buy it, you get a paid receipt, you send it in to us, and we (pay a rebate)."

According to SDG&E, customers were very satisfied with the program because they were able to sign their rebate checks over to vendors and have the vendors deal with the program details. Vendors inform customers about the program and the measures for which they can receive rebates. Customers could then receive a discounted price for an energy efficient measure by signing over their rebate and not having to determine themselves which measures fell into the program scope.

Effect of Third Party Programs

The two utilities who felt there was some impact on the program and its ability to meet its accomplishments were SDG&E and PG&E. SCE and SDG&E mentioned that during the 04/05 program cycle, a similar program targeting a similar set of customers was in operation by a third party. Higher rebates were offered for a number of similar measures, which likely decreased program participation. The competing program served the 20 to 100 kW energy

demand customers, which allowed the Express Efficiency program to exclusively serve the very small customers whose energy demand was less than 20 kW.

PG&E listed a number of local third-party programs that operated in its service territory. As contracts with PG&E were established, PG&E was required to inform customers who submitted applications under the Express Efficiency program, but also qualified for a third party program. This was especially important in the cases where these customers would receive a higher rebate from the third-party program. As stated by a PG&E program staff member, "consider that we wouldn't be serving our customers well by putting them onto a program that doesn't give them the best payback for what they're investment is in. That could only create animosity if they find out that you pointed them in a direction towards something that wasn't in their best interest (had a lower incentive)."

Hard-To-Reach Participation

Each of the IOUs feels they were successful at reaching the hard-to-reach (HTR) customer segments, and all but SCE met its HTR goals. Through its interviews, the Itron team found that each of the utilities relied on a slightly different definition of the HTR customer segment when submitting their month CPUC reports. For example, SCE defined the HTR customer segment by two criteria: customer size (by electricity usage) and geography (by ZIP code). SCG and PG&E also used these criteria, but included businesses where a language other than English was spoken, the building in which it is located is leased, and those with less than 10 employees. This may offer an explanation as to why SCE was not able to meet its HTR goal. Note that the criteria used by SDG&E were not clarified during Itron's interview with the program manager.

Efforts were made by each of the utilities to encourage participation by the HTR customer segment. SDG&E translated program flyers into Spanish and Vietnamese and was able to target very small customers who could not be served by the competing third-party program described earlier. SCE's program benefited from the efforts made to communicate with the HTR customer segment through the Direct Install program. Direct Install has cultivated a number of relationships with community-based organizations by sending its account executives to their events.

Separation of Upstream HVAC and Motors Program

As part of the interviews, the Itron team asked each of the program managers how they felt about pulling motors and certain HVAC measures out of the Express Efficiency program and developing the Upstream HVAC and Motors program. SCG was not questioned about this as it does not rebate measures affected by the Upstream program. The managers from the other three IOUs offered similar statements that support this program change. One manager said that these measures have found "a better home." During the 04/05 program cycle, more

customers purchased the measures covered under the Upstream program once distributors received incentives to market these products. When this subset of higher efficiency measures had been offered under the Express Efficiency program, customers were not choosing them (perhaps due to a lack of information). Once the rebates were moved upstream, distributors received an incentive and then convinced customers to purchase, for example, higher efficiency motors.

The SDG&E program manager mentioned that, occasionally, customers would ask why they were not receiving a direct rebate for these measures. However, once it was clarified that they were receiving a discounted price from the distributors (similar to the Upstream Lighting program), they were satisfied.

A.2.4 Recommended Program Changes

A review of the 2003 Express Program Interview Findings suggests that a number of the recommendations were incorporated into the 04/05 program. In an effort to continue improving the program, Itron asked the program managers for input. Program managers made a variety of suggestions regarding program improvements and additional measures that could be covered (program staff do not necessarily agree on these recommendations):

- Continue statewide coordination to maintain consistency in rebate levels and program offerings,
- Update base case for lighting from incandescent lamps,
- Change terms and conditions for pipe insulation,
- Try to attract dry cleaners to the program,
- Provide incentives for recycling refrigerators to provide businesses with an incentive not to re-sell equipment (in other words, to get old equipment off of the market), and
- Offer an extreme energy efficiency building makeover through the Express Efficiency program.

In addition, program managers suggested a number of measures that could be included in future programs:

- Ice machines,
- Accent/display lighting,
- Anti-humid film controls for fans in motors, and
- CoolTrol system.

A.3 Upstream HVAC and Motors Program Interview Findings

This section presents a summary of key findings from interviews conducted with IOU program managers of the 2004/2005 Upstream Motors and HVAC Programs as well as managers of the 2006/2008 programs. Interviews focused on the roles and responsibilities of IOU staff and subcontractors; program marketing; trade ally recruitment and participation; program incentives; key barriers to increased program participation on the part of end-use customers; lost opportunities for the 2004/2005 program; modifications to the program between the 2004/2005 and 2006/2008 program cycles; and the perceived effectiveness of these modifications.

KEMA staff conducted telephone interviews with six of the 04/05 and 06/08 Program Managers at SCE, SDG&E, and PG&E during the summer of 2007. Results will be used as the basis for examining process-related issues through interviews with participating distributors. While PG&E's Upstream Motors and HVAC Program is currently still operating, SCE has eliminated the upstream program from its portfolio and SDG&E's upstream program is currently being administered by a third party. However, the results of this research are crucial to addressing the appropriateness of an upstream delivery mechanism for motors and HVAC incentives and because all of the IOUs continue to administer one or more other upstream programs.

A.3.1 Key Findings

Trade Ally Recruitment

The IOUs leveraged existing relationships with many equipment distributors to funnel them into the 04/05 Program. Some distributors downloaded the participation agreements from the Program website or were recruited directly by the Program's implementation contractor (Energy Solutions). Key elements of the recruitment process include the following:

- **A compelling financial proposition**, with rebate levels upwards of half to two-thirds of the incremental costs for high-efficiency equipment;
- **Experienced program managers** who obtained ongoing feedback from program participants and kept the program running smoothly;
- A web-based, paperless application process that allowed single-item entry or mass uploads of data for multiple rebate requests; and
- **The Distributor Participation Agreement**, which obtained commitments from CEOs and ensured that only distributors (not, e.g., contractors) participated in the program;
- The promise of timely incentive payments; and
- Performance incentives for a handful of distributors with the highest program sales volumes.

Process Issues

Program staff differed in their impressions of the program by IOU. Overall, there were few process-related issues identified with the Program beyond the principal impression among SCE and SDG&E program staff that the program was somewhat misdirected in its focus on upstream market actors rather than end-users. In addition to this key issue, the interviews revealed the following (comparatively minor) process-related issues.

- **Duplicate Applications.** The IOUs had some initial problems with duplicate applications from some distributors. These seemed to be genuine errors rather than intentional fraud. These errors lead to some improvements to the online application tool to enable additional cross-checks for errors and possible duplicates;
- Contractor reluctance to share customer information with distributors;
- Suspicion among some IOU program staff that some distributors were not passing the incentives down to the customers; and
- Confusion among some customers regarding the need for equipment inspections when they were unaware of having received any incentives through an IOU program.

IOU Program Staff Impressions of Key Barriers to Trade Allies

We asked IOU program staff to provide their impressions of the main barriers to trade ally participation in the program. The barriers they describe differ little from the barriers described in the program documentation. These barriers include:

- Entering data into the online rebate application tool required staffing and time that often weren't available;
- **Inability to calculate financial benefits** of selling high- or premium-efficiency equipment, lack of time to conduct the calculations;
- Unclear incentive to sell premium-efficiency motors among motor distributors who also rewind motors (because rewinding costs less than replacing with a premium-efficiency model);
- Ease of use of the program's rebate application tool (this was far less of a barrier after the program worked through some initial problems);
- **Reluctance** to gather customer contact information from contractors; and
- Confusion among some distributors regarding the program's size limit for ACs.

IOU Program Staff Impressions of Key Barriers to Consumers

Program staff impressions of the main barriers to consumer purchase of the equipment covered by the program also differ little from the barriers described in the program documentation. These barriers include:

- Lack of awareness/knowledge regarding energy-efficient equipment;
- First cost of equipment;
- Lack of equipment availability; and
- Lack of direct/visible rebates to consumers.

IOU Program Staff Impressions of Lost Opportunities

Program staff reports that some of the motors and large air conditioning units that were part of the 04/05 Express Efficiency Program were not included in the Upstream Program, which caused some confusion among trade allies. Additionally, some units did not meet the EER requirements for the Program despite having high IPLV, which also caused confusion and some frustration among distributors who focus on IPLV ratings to a greater extent than EER. (Note: the 06/08 program requirements have switched from qualification based on minimum EER and IPLV ratings to qualification based on minimum EER or IPLV ratings.) Other lost opportunities perceived by program staff included the lack of incentives for air-cooled chillers, variable speed drives/variable frequency drives, gear drive speed reducers (mechanical), and CO2 sensors and digital controls for HVAC systems.

06/08 Program Modifications

Program staff provided an overview of key changes between the 04/05 and 06/08 implementation periods. Chief among these changes are elimination of the upstream program from SCE's portfolio and the shift in program administration from the IOUs to third parties in SDG&E's service territory. PG&E's 06/08 program continues to operate in much the same way as the 04/05 program. In addition to these major changes, the following modifications were also made:

- Energy savings numbers were updated to reflect new data and requirements.

 Updates included incremental measure cost as well efficiencies and new measures;
- The EER and IPLV requirement was changed to EER or IPLV (as described above);
- Changes in federal equipment standards resulted in changes in program requirements for Single Phase and 240-760 kBtuh HVAC units;
- A separate rebate category was added for package AC units >760 kBtuh. These units were included in the "240 kBtuh and above" category for the Upstream program in 04/05;

- The maximum secondary voltage motor horsepower was raised from 200 hp to 500hp; and
- A new version of the online application was brought online with a multitude of new features and improvements like a more user friendly interface, improved data input and processing capabilities, address checking, edit and resubmit feature, notes, duplicate checking, data importing, online Utility review and approval, instant user feedback, improved equipment database resulting in faster application input, processing, and rebate check delivery.

Suggested Improvements

In addition to the suggestion made by IOU some program staff to the shift in focus for program incentives (from upstream to mid- and/or down-stream), interviewees made the following recommendations to improve the upstream program:

- To the list of qualifying measures, add the following: add air-cooled packaged chillers; motor early replacement; variable speed drives; digital controls; and Helical gear reducers;
- **To encourage replacement of functional motors**, test installed motors for vibration (pending failure) and combinations of low efficiency/over-sizing; and
- Address the issue with current DEER methodology. One IOU staff member felt that the current methodology does not correctly account for sizing, load, and operating hours of old units, nor does it account for all possible equipment enduses.

Appendix B

Express Participant Tables

2005 Participation by Technology

			Customers		Reba	ate	Energy S	Savings
Utility	tech	Unique Sites	Applications	Pct of Program	Dollars	Pct of Program	kWh	Pct of Program

			Process Supplementa NonParts
CA30	I'd like to read a brief series of statements and I'd like you to tell me how well each statement describes your beliefs about energy efficient investments. We'll use a 1-to-10 scale, where 1 means you don't agree at all with the statement, and 10 means you agree completely with the statement. Here we go		х
1	When considering a new energy efficiency investment, I am concerned that the actual bill savings will be less than what	CA3a]
	was estimated.		41
2	I don't have the information I need to make an informed decision about energy efficient investments. I feel uncertain about the reliability of information provided by non-utility firms proposing energy-efficient investments for	CA3a	11
3	my business.	CA3a] [
4	I am satisfied with the energy conservation decisions I have made in my business.	CA3a]
5	There is too much time and hassle involved in selecting a qualified energy efficiency contractor.	CA3a	41
7	Lack of financing is a barrier to our organization making energy efficiency investments that we want to make. I don't see benefits to energy efficiency because I am a leaseholder	CA3a CA3a	11
CA3a	Suppose your company identified an energy efficient building upgrade, such as a lighting change-out, that would pay for itself through reduced utility bills within 2 yearsIf the cost of this upgrade were \$2,000, how difficult would it be for your		x x
	company to find the funds to invest in this energy efficient upgrade? Would you say	CAPB	- I
2	Very difficult, the funds would likely not be available Somewhat difficult, it would take some work, but funding could be found	CAPB	- I
	Not difficult, finding the funds for such an investment would be easy	CAPB	11
	Refused	CAPB	11
99	Don't Know	CAPB]
	O 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1		
CAPB	Given that it would take 2 years to recoup the initial investment through reduced utility bills, how interested would your company be in pursuing such an investment? Would you say		X X
1	Very Interested	CAPB2	1 l
2	Somewhat interested	CAPB2] [
	Not at all interested	CAPB2] [
	Refused	CAPB2	41
99	Don't know	CAPB2	J [
APB2	Energy efficient investments pay for themselves through reduced utility bills over time. Considering projects your company would approve, what is the longest period of time your company would allow for an energy efficient investment to pay for itself?		x x
	Years	CA4	41
	Refused Park Variable	CA4	41 1
99	Don't Know	CA4	-
CA4	Prior to 2004, had your facility ever installed equipment that involved the receipt of rebates or incentives from an energy efficiency program?	CAF	x x
1 2	Yes No	CA5 CA7	-
	Refused	CA7	1
	Don't know	CA7	11

			Process	Sipplements
	EUL RETENTION BATTERY			
	We'd like to ask you about some of the CFLs you've installed.			
	If CFL =1			
	We would like to get some information about any CFL lamps that you purchased through the EXPRESS Program that have either FAILED or BEEN REMOVED.			
	A FAILED LAMP means that the light does NOT switch on.			
Comment	A REMOVED LAMP means it has been taken out of it's original location even if it is still working. For example, if you were dissatisfied with the bulb, but it could be turned on.			
RET10	How many CFL lamps did you INSTALL through the Express Program?			
	Enter number installed	RET30		
	Refused	RET30		
99	Don't Know	RET30		
		-		
	How many of the <&RET10> CFL lamps you installed have FAILED OR been REMOVED?			
	None	RET70		
	Enter number, from 1 to <&RET10NO>	Comment		
	Enter the percent.	Comment		
	Refused	RET70		
99	Don't Know	RET70		
Comment	If RET30 in (1,88,99) then skip to RET70 [READ THE FOLLOWING] Let's break down into the number CFL of lamps that failed or were removed. A failed lamp means the light does not switch on. A removed lamp means it has been taken out of its original			
RET40	location EVEN if it is still working. For example: taking out a light during a remodel.			,
RET40	How many CFL lamps have FAILED? IF NEEDED: If the CFL doesn't allow the lights to switch on, then it has failed. If it fails and it is replaced by something else, then it is still considered a failure.			
RET40	How many CFL lamps have FAILED? IF NEEDED: If the CFL doesn't allow the lights to switch on, then it has failed. If it fails and it is replaced by something else, then it is still considered a failure. If NUMBER You showed <&RET30NO> as failed or removed.			
	How many CFL lamps have FAILED? IF NEEDED: If the CFL doesn't allow the lights to switch on, then it has failed. If it fails and it is replaced by something else, then it is still considered a failure. If NUMBER You showed «&RET30NO> as failed or removed. 	REFRIGERATION EQUIPMENT BATTERY		
	Now I would like to ask you a couple of questions about your refrigeration equipment.		
	What is a factor of the state o		
	What kinds of refrigeration equipment, if any, is present at your facility? Residential Sized Refrigerator	R2	
	Residential Sized Freezer	R2	
	Larger Standard Refrigerator (>30 cubic feet)	R2	
	Self Contained - Coffin/Horizontal Case	R2	
	Self Contained - Vertical Case (multi shelf)	R2	
	Single-Deck display cases - Open single-deck	R2	
	Single-Deck display cases - Closed service case	R2	
8	Single-Deck display cases - Island coffin/tub (shop around)	R2	
	Single-Deck display cases - Coffin/tub (one-side shopping)	R2	
	Multi-Deck (vertical) display cases - Open/reach-in multi-deck	R2	1
	Multi-Deck (vertical) display cases - Glass-door cases	R2	1
	Walk-Ins and Preparation Areas - Freezer/Low Temp	R2	1
	Walk-Ins and Preparation Areas - Cooler/Med Temp	R2	
	NONE	G1	1
	Other Refrigeration (Specify)	R2	
	Refused Don't know	R2 R2	
98	DONT KNOW	K2	
R2	How would you describe the condition of the refrigeration equipment currently in use at your facility? Would you say it is in 'poor condition', 'fair condition', or 'good condition'?		
	In poor condition	R3	
	Fair condition	R3	
	Good condition	R3	
	Refused	R3	
98	Don't know	R3	
	How old is the refrigeration equipment currently in use at your facility? Would you say it is		
	Less than 5 years old	R4	
	Between 5 and 10 years old	R4	
	Between 10 and 15 years old	R4	
	More than 15 years old Refused	R4 R4	
	Don't know	R4 R4	
R5a	ASK IF EXPRESS REFRIGERATION PARTICIPANT ASK R5a THROUGH R5d FOR UP TO THREE EXPRESS MEASURES According to our records your organization installed a &EXP_REF_TECH1 through the Express Efficiency program, is this correc	1 7?	
	Yes	R5b	
	No	R6	1
	Refused	R6	1
99	Don't know	R6	
	I'd like to ask you a few questions about the equipment that was removed and replaced when you installed the &EXP_REF_TEC through Express Efficiency What type of refrigeration equipment was removed and replaced when you installed &EXP_REF_TECH1 through the Express Efficiency Program?		
1	Old Strip curtains	R5c	1
	Older Main door cooler/freezer door gaskets	R5c	1
	Older Anti-sweat heat controllers	R5c	1
	Same Equipment, just newer	R5c	1
66	NONE - Not a replacement	R9d1	1
77	Other (Specify)	R5c	1
88	Refused Don't know	R5c R5c	

R5c		
	How would you describe the condition of refrigeration equipment that was removed and replaced? Was it	R5d
	Poor condition	R5d
	Fair condition	R5d
	Good condition	R5d
	Refused	R5d
	Don't know	R5d
R5d	Approximately how old was the refrigeration equipment that was removed and replaced by the cooling equipment we just	
	discussed? Would you say	
	Less than 5 years old	R9d1 R9d1
	Between 5 and 10 years old 10 to 20 years old	R9d1
	more than 20 years old	R9d1
	Refused	R9d1
	Don't know	R9d1
Pod1	ASK if &UTILITY in (SDGE, SCG) Our records indicate that your company installed the refrigeration equipment in &MONTH &YEAR through the Express Efficiency Program, is this correct?	
	Yes	R33
	No	R9d2
	Refused	R33
99	Don't know	R33
R9d2	Approxmately which Year and Month were the refrigeration equipment installed and operating?	
DATE	Open?	R33
Date	Efficiency Program in &MONTH &YEAR. When did you install &EXP_REF_TECH1? Dpen?	R33 R33
	Refused Don't know	R33
R9f1	ASK if &UTILITY = SCE and &Program = Express In what year did you install &EXP_REF_TECH1? (PROBE FOR BEST GUESS)	
	2004	R9f2
	2005	R9f2
	2006	R9f2
	2007	R9f2
	Refused	R33
	Don't know	R33
	And can you recall which month? If you can not get the month, try to get the season. January	R33
	February	R33
	March	R33
	April	R33

	This is not a sales call.			
Intro3:s	This is a fact-finding survey only.			
	According to our records, your organization participated in &UTILITY's 2004/2005 UPSTREAM MOTOR Program by installing electric motors. I was told that you are the person most knowledgeable about these motors. Is this correct?			
	Our records show that &CONTRACTOR installed these motors through the UPSTREAM MOTOR Program in &MT_REB_DATE			
	Yes No	Outcome1 Hi		
	No one knows about the Program	Thank & Terminate		
	Hello, this is <interviewer name=""> calling on behalf of &UTILITY from Itron Incorporated.</interviewer>			
	This is not a sales call.			
Outcome1	May I please speak with &CONTACT, the person at this location who is most knowledgable about your organization's motor installation in &MT_REB_DATE.			
	[IF NEEDED] This is a fact-finding survey only.			
	[IF NEEDED] This is a fact-finding survey only, authorized by the California Public Utilities Commission. &UTILITY wants to better understand how businesses like your's think about and manage their energy consumption.			
	(GO TO NEXT SCREEN)			
PERSON	According to our records, your organization installed electric motors through &UTILITY's 2004-2005 UPSTREAM MOTOR PROGRAM. Are you the person most knowledgable about your organization's participation in this program?			
	Yes No	Intro3:s		
	No one knows about the Program	Intro3(99)		
	If Person(3)			
Intro3(99)	Thank you for your time. We need to speak with the person at your organization that is most familiar with your participation in the 2004/2005 UPSTREAM HVAC and MOTORS Program. Those are all of the questions I have for you today.	Abandoned User30		
	Before we start, I would like to inform you that for quality control purposes, this call may be monitored by my supervisor.			
COMMENT	Today we're conducting a very important study on the energy needs and perceptions of organizations like yours. We are interested in how organizations like yours think about and manage their energy consumption.			
	The four investor-owned utilities in California are cooperating on this important study, authorized by the California Public Utilities Commission. Your input will allow &UTILITY to build and maintain better energy savings programs.			
	This is a fact-finding survey only, and responses will not be connected with your organization in any way.

Here we go When considering a new energy efficiency investment, I am concerned that the actual bill savings will be less than what was estimated. I don't have the information I need to make an informed decision about energy efficient investments. I feel uncertain about the reliability of information provided by non-utility firms proposing energy-efficient investments for my business. I am satisfied with the energy conservation decisions I have made in my business. There is too much time and hassle involved in selecting a qualified energy efficiency contractor. Lack of financing is a barrier to our organization making energy efficiency investments that we want to make. I don't see benefits to energy efficiency because I am a leaseholder	CA2 CA2 CA2 CA30 CA30 CA30 CA30 CA30 CA30 CA30 CA30	
11 22 33 44 45 56 67 7 CA3a	Essential to your business Very important Somewhat important or Not at all important Refused Don't know In marketing materials or in communications with customers, does your company highlight they ways in which your business is environmentally conscious? Yes No Other (Specify) Refused Don't know I'd like to read a brief series of statements and I'd like you to tell me how well each statement describes your beliefs about energy efficient investments. PARTICIPANT CUSTOMER SURVEY FOR EXPRESS EFFICIENCY AND UPSTREAM HVAC AND MOTORS PROGRAMS CFL Retention Survey (2002/2003 Participants)

	INTRODUCTION AND FINDING CORRECT RESPONDENT		NTG/DC MODEL	SR NTG	GROSS/ BILLING	ENG	l
Q1	If 2003 PARTICIPANT, READ: Hello, this is <interviewer name=""> calling from Itron on behalf of &UTILITY. May I please speak with &VERNAME or the person at this location who is most knowlegable about your facility's construction, renovation, or operation of your physical facilities? This is not a sales call.</interviewer>		1	1	1	1	
	This is a fact-finding survey regarding the success of the lighting retrofit that took place at your facility sometime in &MON1 and &YR1. The goal of the study is to determine the lifetime of the lighting equipment installed under &UTILITY's Express Efficiency Program. The California IOUs want to better understand how long lighting fixtures typically last.						
	IF 2002 PARTICIPANT, READ:

END. Those are all the questions I have for today. Thank you for you time and help in this important study.

Appendix D

INTRODUCTION AND FINDING CORRECT RESPONDENT Who would be the best person most knowledgeable about your organization's energy using equipment such as cooling and lighting? [ENTER TECHNICAL CONTACT NAME] May I speak with him/her? Hello, my name is <interviewer name=""> calling from Itron on behalf of &UTILITY from Itron, Inc. Today we are conducting Q1 a very important study on the energy needs and perceptions of organizations like yours. We are interested in how organizations like yours think about and manage their energy consumption. The four investor-owned utilities in California are cooperating on this important study, authorized by the California Public Utilities Commission. This is a fact-finding study only, responses will not be connected with your firm in any way. I understand you are the person at this location that is most knowledgeable about decisions affecting energy using equipment such as cooling and lighting. Is this correct? 1 No, that person is not available right now 2 Unable to refer someone who can help 3 Yes, let me transfer you to 4 Yes, let me transfer you to 5 S1 4 Yes, let me transfer you to 6 Other reason (specify) 8 Refused 9 Don't know Name</interviewer>	NTG/DC MODEL	GROSS/ BILLING

	INTRODUCTION AND FINDING CORRECT RESPONDENT		NTG/DC MODEL	SR NTG	GROSS/ BILLING	MK
CA30	Now I'd like to read a brief series of statements and I'd like you to tell me how well each statement describes your beliefs about energy efficient investments. We'll again use a 1-to-10 scale, where 1 means you don't agree at all with the statement, and 10		1			
	means you agree completely with the statement. The first/next one is					
1	When considering a new energy efficiency investment, I am concerned that the actual bill savings will be less than what was estimated.	CA3a				
3	I don't have the information I need to make an informed decision about energy efficient investments.	CA3a				
5	I feel uncertain about the reliability of information provided by non-utility firms proposing energy-efficient investments for my	CA3a				
3	business.					
	am satisfied with the energy conservation decisions I have made in my business.	CA3a				
	There is too much time and hassle involved in selecting a qualified energy efficiency contractor.	CA3a				
8		CA3a CA3a				
9	(ASK IF CC4^=1) I don't see benefits to energy efficiency because I am a leaseholder	CA3a				
CA3a	Suppose your company identified an energy efficient building upgrade that would pay for itself through reduced utility bills within 2 yearsAn example would be a lighting change out. If the cost of this upgrade were \$2,000, how difficult would it be for your company to find the funds to invest in this energy efficient upgrade? Would you say		1			
1	Very difficult, the funds would likely not be available	CAPB				
	Somewhat difficult, it would take some work, but funding could be found	CAPB				
	Not difficult, finding the funds for such an investment would be easy	CAPB				
	Refused	CAPB				
99	Don't Know	CAPB				
CAPB	Given that it would take 2 years to recoup the initial investment through reduced utility bills, how interested would your company be in pursuing such an investment? Would you say [Very Interested]	CAPB2

	"In this survey we use the term "NEMA Premium motors" to refer to very high efficiency motors that meet specific performance criteria developed by the National Electrical Manufacturers Association. We use the term "EPAct Motors" to refer to motors that meet current federal minimum efficiency standards contained in the Energy Policy Act; new motors installed in California must be, at a minimum, EPAct motors. Finally, we use the term "Standard Efficiency Motors" to refer to typically older motors that do not meet the current Federal standards."

CA6	What type of equipment did you install through this (these) program(s)? [READ RESPONSE CATEGORIES]			1	1	1	
	Indoor lighting	CA7					
	Cooling equipment Natural gas equipment, such as water heater, furnace or appliances	CA7					
4	Insulation or windows	CA7					
	Refrigeration Industrial process equipment	CA7					
	Greenhouse heat curtains	CA7					
	Food service equipment	CA7					
	OTHER (specify)	CA7					
	Refused Don't Know	CA7 CA7					
CA7	How knowledgeable are you about the energy efficient products that are available and how they'll perform? Please give me a rating from 1 to 10, where 1 means you aren't knowledgeable at all, and 10 means you are fully knowledgeable.			1			
CA7#	Rating 1 to 10 Refused	CA7A CA7A					
	Don't know	CA7A					
CA7a	How likely will you be to actively consider energy-efficient products when installing or replacing equipment for your business in the future? Please give me a rating from 1 to 10, where 10 means you're EXTREMELY likely to consider energy-efficient products. Rating 1 to 10	CA15A	1	1			
	Refused	CA15A					
	Don't know	CA15A	1				ĺ
CA1E~	Over the next 3 years, how would you characterize your company's business outlook? Would you say it is						
	Excellent	AP6	1				ĺ
2	Good	AP6	1				ĺ
3	Fair Adequate	AP6 AP6					ĺ
	Adequate Poor	AP6	1				ĺ
88	Refused	AP6	1				ĺ
99	Don't know	AP6	1				ĺ

Comment	One way that businesses can reduce their energy use is to install more energy efficient equipment. Since one of the factors that influences energy use is the kind of equipment a business has, we would like to ask you about lighting equipment purchases you have made since January 2004.	LI10					
LI10	ASK ALL Since January 2004, have you made any changes in indoor lighting equipment at &SERV_ADDR other than the routine replacement of burned out bulbs? This would include changes to fixtures or ballasts, and the addition of reflectors or lighting controls.			1	1	1

"In this survey we use the term "NEMA Premium motors" to refer to very high efficiency motors that meet specific performance criteria developed by the National Electrical Manufacturers Association. We use the term "EPAct Mo to refer to motors that meet current federal minimum efficiency standards contained in the Energy Policy Act; new motors installed in California must be, at a minimum, EPAct motors. Finally, we use the term "Standard Efficiency Motors" to refer to typically older motors that do not meet the current Federal standards."	otors"

INTRODUCTION PY2004-05 EXPRESS EFFICIENCY MARKET ACTORS SURVEY and Lam calling from Itron, on behalf of &UTILITY. We are contacting vendors and Hello. My name is OUTCOME1 distributors of &VENDTYPE equipment to the non-residential market sector regarding your opinions of the 2004-05 Express Efficiency rebate program. Yes This is not a sales call. It is a fact finding survey that has been authorized by the California Public Utilities Commission. Yes Yes Our records indicate that your company completed some work through the Express Efficiency Program during the 2004-2005 No Yes program cycle. Is this correct? Double Check 99 Don't know Ask if &Participant = 1 Double Add question to try to jog memory - if still does not remember and there is no else to talk to - T&T PERSON1 &UTILITY is interested in speaking with the person at your company that is most familiar with &VENDTYPE equipment. Would INTRO Yes 99 Don't Know T&T will take about 15 minutes. The information you provide will be kept confidential and will not be associated in an Explain way with you or your company. Next Part Who would be the person who is most knowledgeable about your organizations' participation in &UTILITY's 2004/2005 EXPRESS EFFICIENCY Program?[Enter technical Contact Name and move on.] No Yes Record Name, as &CONTACT Don't know Ext Next NonPart Who would be the person who is most knowledgeable about your organizations' sales and installations of &VENDTYPE equipment?[Enter technical Contact Name and move on.] Record Name, as &CONTACT May_I Don't knov Yes MAY_I May I speak with him or her? Yes 1 Yes, let me transfer you. OUTCOME2 No, he/she is not available right now. Record &CONTACT and &CPHONE to make Appointment Appointment No. He/she does not have time to take this survey Hello. My name is _____ and I am calling from Itron, on behalf of &UTILITY. We are contacting vendors and OUTCOME2 distributors of &VENDTYPE equipment to the non-residential market sector regarding your opinions of the 2004-05 Express No Yes Efficiency rebate program. and I am calling from Itron, on behalf of &UTILITY. We are contacting vendors and and I am calling from Itron, on behalf of &UTILITY. We are contacting vendors and distributors of &VENDTYPE equipment to the non-residential market sector regarding the types of equipment you sell. This is not a sales call. It is a fact finding survey that has been authorized by the California Public Utilities Commission.

PERSON2 &UTILITY is interested in speaking with the person at your company that is most familiar with &VENDTYPE equipment. Would that he write I behould take about 45 minutes. Yes No Yes Yes Yes Yes that be you? It should take about 15 minutes Yes, I am the person most familiar with our company's involvement in installation of equipment rebated under the programs INTRO No, our company does not want to participate in this survey.

Our company was involved in installation of equipment rebated under the programs, but someone else dealt with these MAY_I nstallations T&T 99 Don't know Т&Т As I mentioned, my name is ____ and I am calling from Itron, on behalf of &UTILITY. We are contacting vendors INTRO and distributors to learn about their experiences with the 2004-05 Express Efficiency rebate program. Before we get started with the survey, I would like to inform you this call may be monitored by my supervisor.

T&T Thank you for your time. Good bye.

One of the reasons for this survey is to gain insight into the types of lighting equipment installed during 2004 and 2005. For this reason, several of the following questions ask specifically about work done during 2004 and 2005. We understand that this was several years ago that it may be difficult to remember exact numbers, any approximation you Yes Yes can provide would be greatly appreciated. If &VENDTYPE = Lighting and CFL=1 Scr1_CFL Our records indicate that your company installed approximately &CFLcount CFLs under the Express Efficiency Program during the 2004-2005 program cycle. Does this sound about right? {If needed: push for whether in the ballpark} Nο Yes res (Scr1_T8 To one knows about the EXPRESS EFFICIENCY Program Next Part Scr2_CFL Approximately how many bulbs did you install under the Express Efficiency Program during the 2004-2005 program cycle. A No rough estimate is fine. #PrgBulbs ecord if explanation given instead of # Scr1_T8 99 Don't Know If &VENDTYPE = Lighting and T8=1 Scr1_T8 Our records indicate that your company installed approximately &T8Count T8s under the Express Efficiency Program during the 2004-2005 program cycle. Does this sound about right? No Yes Scr1 Other Scr2_T8 to one knows about the EXPRESS EFFICIENCY Program Scr2_T8 Approximately how many bulbs did you install under the Express Efficiency Program during the 2004-2005 program cycle. A No Yes rough estimate is fine. Record if explanation given instead of # Scr1_Other If &VENDTYPE = Lighting and Other_lighting=1 Scr1_OTHER Our records indicate that your company installed approximately &Lighting_other_count under the Express Efficiency Program during the 2004-2005 program and a Door this ground in both the County of t No Yes during the 2004-2005 program cycle. Does this sound about right? o one knows about the EXPRESS EFFICIENCY Program 99 Don't Know Scr2_Other Approximately how many bulbs did you install under the Express Efficiency Program during the 2004-2005 program cycle. LIGHTING BATTERY		
THIS BATTERY OF QUESTIONS IS FOR &VENDTYPE = Lighting		
One of the reasons for this survey is to gain insight into the types of lighting equipment installed during 2004 and 2005. For this reason, several of the following questions ask specifically about work done during 2004 and 2005. We understand that this was several years ago that it may be difficult to remember exact numbers, any approximation you can provide would be greatly appreciated.	Yes	No
LI1 Which of the following types of lighting products do you sell and/or install? [ACCEPT MULTIPLES]	Yes	Yes
1 Linear Fluorescents (including T12, T8, T5s) Li2 Lighting for High Bay Fixtures Li2		
2 Lighting for High Bay Fixtures LI2 3 Exit Signs LI2		
4 Lighting Controls Li2		
5 Reflectors LI2 6 Pulse Start Metal Halides LI2		
7 Compact Fluorescents (CFLs)		
8 Incandescents LI2		
9 Halogens LI2 77 Other [SPECIFY] LI2		
88 Refused LI2		
99 Don't know		
LI2 What percent of your overall lighting equipment sales in 2004 and 2005 was to commercial and industrial customers?	Yes	Yes
&%LCI RECORD PERCENTAGE LI3		
101 Refused LI3 102 Don't know LI3		
TOE DOTT WATER		
CFLs		
Ask if L11 = 7		
L13 Approximately how many CFLs did your company sell during 2004 and 2005?	Yes	Yes
&CFLSOLD RECORD NUMBER LI4 66 None LI4		
SR Refused Li4		
99 Don't know LI4		
Approximately, what percent of the CFLs you sell and/or install are integral? [IF NEEDED: Integral means the lamp and ballast		
L14 are one unit, as opposed to modular CFL where the lamp is separate from the ballast]	Yes	Yes
8%INT RECORD PERCENTAGE		
101 Refused LI5 102 Don't know LI5		
In the lighting jobs you completed in 2004 and 2005, about what percentage of the CFLs you installed were to replace existing LI5 CFLs (as opposed to incandenscents, mercury vapor, or other bulb types)?	Yes	Yes
8/MEPLIRECORD PERCENTAGE LIG	\neg	
101 Refused LI6		
102 Don't know		
LIG When you install CFLs, do your customers usually purchase spares so they can replace any future CFL burnouts?	Yes	Yes
1)Yes Li7		103
2 No LI8		
88 Refused LI8 99 Don't know LI8		
99 Don't know		
Ask if LI6 = 1 About how many "spare" bulbs do you leave behind for future replacements? I am looking for a percetage of job size. [IF LI7 NEEDED: For example, if you installed 100 bulbs and left 10 extra behind, that's 10% of the job size.]	Yes	Yes
&%LEFT RECORD PERCENTAGE

INTRO	As I mentioned, my name is and I am calling from Itron, on behalf of &UTILITY. We are contacting vendors and distributors to learn about their experiences with the 2004-05 Express Efficiency rebate program. Before we get started with the survey, I would like to inform you this call may be monitored by my supervisor.	Scrn_Addr	No	١
	Thank you for your time. Good bye.	END	Yes	,

	SCREENER		
	One of the reasons for this survey is to gain insight into the types of refrigeration equipment installed during 2004 and 2005. For this reason, several of the following questions ask specifically about work done during 2004 and 2005. We understand that this was several years ago that it may be difficult to remember exact numbers, any approximation you		Yes
	can provide would be greatly appreciated.		
Scr1_Ref	Our records indicate that your company installed approximately &RefrigUnits &RefrigMajType under the Express Efficiency Program during the 2004-2005 program cycle. Does this sound about right?		No
1	Yes	CC1	
2	No No	Scr2_Ref
